

Pathfinder Advantage Release 7.3

SERIOUS SOFTWARE FOR
A FUN BUSINESS.

Pathfinder Advantage Release 7.3 is here! Please contact us today to schedule an upgrade of your software as early as March 12th. If you are a current user of Pathfinder Advantage with an active support contract, you are eligible for a **FREE** upgrade.

Below you will find a list of the major new features and improvements found in Release 7.3. Please note that the Asset ROI Tracking, Daycare Management, and Consignment Ticketing are add-on modules for which you must purchase a software license. There are also fees associated with the use of the web ticketing system.

Point of Sale

- Charge sales at the POS to a group or birthday party, or take payment at POS but still track against the event
- Charge sales to an employee or customer A/R account
- Randomly ask customizable survey questions at POS
- Reward points can now be used to pay for taxes
- More reward program and season pass information is now printed on receipts
- Improved handling of head counts at POS
- Supports scratch-off PIN numbers on the back of player/gift cards
- Process consignment vouchers and web tickets quickly and easily through the POS application

Groups and Birthday Parties

- Simplified handling of calendar when already viewing an event
- Easier to use Accounts Receivable system with better reporting
- Customize the information that appears on the calendar for events

PO Box 1359
Roxboro, NC 27573

Inventory Control

- New Recipe item type designed to greatly simplify inventory control for food sales
- Easily add Recipes to Packages in order to build combos
- Improved tax rate system allows more than 5 tax rates and provides a default rate for each
- Enable any ticket item for sale on the web directly from the inventory maintenance screens
- Import Bonita Marie and FunExpress DPL files

Time Clock and Employee Scheduling

- Send employees text messages through the time clock system
- New reports allow you to track your labor costs versus sales and easily compare scheduled hours to worked hours
- Scale the schedule grid in 15, 30, or 60 minute increments

Customers and Membership

- Track additional customer information, such as medical information and emergency contacts
- Sign up new members at the kiosk without requiring a purchase
- Specify for each customer if they would like to receive bulk e-mail or bulk postal mail communications
- Sign up new members via the internet (part of web ticketing)

Movies and Capacity Managed Ticketing

- Restrict ticket types to only be available on certain days of the week and times of day
- Customize the description of the houses/rooms
- Coming Soon: Sell your movie/laser tag tickets on the internet

CAD Debit Card Readers

- Chain multiple “buckets” together on a single swipe if the first bucket doesn't have enough value to activate the reader
- Intelligently recognizes when a reader is moved between runs or controllers

Daycare Management

- Track important medical and personal information about each child
- Identify which people are authorized to pick each child up
- Check each child in and out, and track which parent was involved
- Perform check in and out using a search or with card identification
- Provide messages at POS that tell the cashier what the child is and isn't authorized to purchase
- Use integrated debit cards so that children don't need to carry cash

Consignment Ticketing

- Sell tickets at remote locations, such as hotels and ticket vendors, without requiring any connection back to your system
- Easily process consignment vouchers at the POS station
- Use barcoded vouchers, or manually enter a voucher number
- Bill your vendors for tickets used via the A/R system
- Use reports to see which vendors are performing the best

Web Ticketing

- Sell tickets for your facility on the internet
- Prints barcoded tickets, which can be used at the POS or turnstiles, or can act as Will Call vouchers
- Enable any ticket item for sale on the web directly from the inventory maintenance screens
- Sales information is posted directly back to your system automatically and in real time
- Highly customizable look and feel
- Funds are delivered directly to you via your credit card merchant processor (approved processors only)
- Help build your customer database by collecting addresses for use with bulk postal mail and e-mail with every transaction
- We do all the hosting and maintenance work for you, so that you don't have to worry about it
- All information is fully encrypted and digitally signed for security

Asset ROI Tracking

- Track historical details about your assets, such as arcade games, attractions, or any other major purchase
- Perform audits to enter meter, ticket, token, and coin counts
- Pull sales data directly from CAD debit card readers, or use token and coin counts for assets without CADs
- Use reports to manage your return on investment for your assets
- Eliminate complicated spreadsheets for managing meter counts

Integrated Credit Cards

- Support for the USA ePay gateway interface
- Improved support for the direct RBSLynk interface

Other New Features

- Track day and night weather and temperature for reporting
- Use “open” session sales tracking that doesn’t require pre-defined session times
- Support for Standard Change MCM-100 Token Dispenser
- Support for up to 4 ticket printers and 5 kitchen printers per station
- Initial support for POS operations using thin clients
- Enhanced support for sending e-mails and notifications directly from our software using authenticated SMTP
